Subject: RE: Per our phone conversation on 5/29/09 regarding the HFX air purifier

Dear Linda,

I am writing in regard to the HFX air purifier I purchased from Sanuvox.

As I mentioned to you, I have spent a lot of money over the years on pharmaceutical grade air purifiers. None of them add up to this Sanuvox, I am truly amazed with this product. I have been sick for many years with a mild case of Cystic Fibrosis, severe asthma and chronic allergies, 7 sinus surgeries in 9 yrs. due to polyp growth filling my sinus cavities from these allergies.

When I read about the 3rd party research that was done on the Sanuvox, it made me decide to purchase it, and it's the best money I have ever spent. Just recently there was some construction work done on the house and I thought I would have to leave for a few days but with this Sanuvox air purifier I was able to stay. My asthma has been controlled all night while I sleep, this is also rare because for years I have been getting up and taking medication so that I could sleep with out wheezing.

I have mine free standing, even though you can hook it up to the furnace, I don't really want to because, I would want to take it with me wherever I go in the future.

Thanks Again Linda,

Wendy LaDue

PURE AIR GROUP
10507 N. 470 E.
DeMotte, IN 46310

Dear PURE AIR GROUP,

Since the installation of new furnace, air conditioner, electronic air cleaner and purifier, you can feel the fresh air blow through the house. Because of the Sanuvox Quattro and Aprilaire 5000, the house smells fresher and is cleaner. The dust has cut down a great deal; I used to dust two or three times a day - Not Anymore!

My children have not had a runny nose once since the installation. They both used to live with running noses and coughing all the time. Doctors attributed their chronic symptoms to indoor and outdoor allergies.

As you know, Brandon's chemotherapy was difficult on his immune system. His ability to fight-off infections, viruses and bacteria will diminish for at least 6 months after he completes chemo. Having the air purifier and filter installed has made such a difference for him! For our 3 year old, every doctor's appointment and chemotherapy visit was the same; Brandon continued to have cold-like symptoms with no fever. Doctors stated his condition was due to allergies, which could lead into a much more serious condition - pneumonia - that would be extremely hard for Brandon to fight without a strong immune system. However, much to the doctors' amazement, Brandon's symptoms have disappeared since the installation of these products!

In addition, our daughter Haley was born almost 3 months premature, with underdeveloped lungs. Like her brother Brandon, she too has allergies and is highly susceptible to upper respiratory infections. Since the installation of the purifier and filter, her cold-like symptoms have also disappeared!

Thank you so much for all you have done for our family. Words can never express our gratitude. You will forever be in our hearts.

Thank you so much,

Brandon White & Erika Smith
"Little" Brandon & Haley White

Subject: product use/results/Wow !

My name is Ron Heres and I am the president of HERES Heating & Cooling Inc, I first began investigating ultraviolet air purifiers in 2002 when I was becoming more and more involved with indoor air quality situations, having been in the hvac trade as a service technician for over 17 years and starting up my own company I saw a need for a product that was unique and effective, something I could sell to help people. I could not gain much confidence from my customers from a product that I only said was a good idea, I needed to be able to market the product in a manner that was more convincing, I realized that I needed to really jump in, invest in the product and see for myself, I needed to believe that the product was worth it.

I purchased the first unit for myself (Sanuvox R3500X) I installed it into my own home and then it happened... I woke up and thought something was wrong with me. What was happening was that my air was being purified and I was breathing fully through my nose at night with no congestion, the air quality so greatly improved that my unknown allergies were disappearing, I was sleeping deeper and more restfully, my wife who does not even have allergies told me that she even noticed the improvement in the air. I became convinced that the product worked and I knew that it was a product that all my customers needed, even if they were skeptical at first, I knew that even if they just tried it they would be convinced. I started installing them for a trial period, "don't pay me now, try it out and I will come get the money later, if you don't like it I'll remove it", everybody paid me! I arrived for payment and found that my customers were ecstatic and happy with the product, only one customer said they didn't notice the difference so I removed it, however 2 weeks later they called me in the evening at home and asked for me to install again since they said that they noticed bad smells without it, amazing!

I have had no problem selling these products to my customers and have received nothing but admiration for the product. Having installed over 30 units in 2004 I look forward to a great year this year also and I anticipate many more. As per the debate of feeling versus science one customer that I have, had professional mold sampling done in 2002, this year we retested the air following the air purifiers installation and found mold levels practically negligible (the rooms with opened windows had some low levels of mold that were identical to the samples taken out doors (types of mold), this proves to me that not only do they "feel" like they work, they test out in the lab that they do! I always maintain client confidentiality for air quality since it can be a terrible thing to have bad air but it seems that my customers are telling their friends and family. I am planning to sell these units for many years not only because they work but also because they make people live healthier lives.

P.S. I am signed on as a dealer, I use your logo in my ad for the yellow pages, lets keep in touch!

P.S.S. I am the best installer in Toronto/Hamilton area. cell 647-225-4328. (I have photos)

Ron Heres, president. HERES Heating & Air Conditioning Inc.

To whom it may concern:

We at the Quality Inn Ocala were given the opportunity to try the SANUVOX Ultraviolet Air Purifier the P800GX. We figured it would be just like anything else we have tried and the promises that we made that the unit would do as stated but never materialized. We decided to give the unit a good test. We have a repeat guest who smokes cigars regularly. He stays with us 4 or 5 days per week. The room has a heavy odor of cigar and all we have been able to do is mask it. Ozone machines nothing seemed to get rid of it. As I said we could just mask it. On Friday we got the SANUVOX to use put it in the room and forgot about it. On Sunday before his arrival I personally went to get the machine. I was very surprised in a day and half the odor was 99% gone. The room would have been acceptable to any guest. (We usually do not sell this room) it's "his room". I am sure that with a weekly use of this machine upon his checkout we could keep it fresh and sellable. We were very impressed with what it done in that room and cant wait to try it in other rooms with different problems, i.e. musty. We highly recommend the SANUVOX based on what we have done and see during our test.

Sincerely,

Katherine S. Zarcone

Montréal, Qc H4W 2W8

Dear Jocelyn,

It's with great pleasure, that I share my story with « SANUVOX » on the C2000X unit I had installed in our home last spring.

For the last few month, I have suffered from allergies such as : dust, pollen, perfum, and cats. A nightmare for me, I have lots of cats at home, my daily routine became very difficult.

I would sneeze often, had difficulty to breathe, specially in the morning. I refuse to use traditional medicine to help my allergies such as asthma pump. I had to take a Benadryl pill every day to help me.

Since the installation of the Sanuvox Unit, my allergy symptoms have been reduced significantly. I take a Benadryl pill only twice a week, and I sometime go a full 10 days before I take a pill.

An interesting note to share as well. This summer, my allergy symptoms came back as if there were no Sanuvox unit install in the house. After verification, my husband found out that the filter was completely blocked not letting any air through, We changed the filter. Now that the air pass through the Sanuvox, again I feel much better.

PURE AIR GROUP
10507 N. 470 E
DeMotte, IN 46310

To Whom It May Concern:

Prior to speaking with PURE AIR GROUP, I had to take Zyrtec (an allergy medication), every morning. I used an inhaler a minimum of 2 times per day, especially in the morning when waking-up at home. I also needed it any time I was inside, whether at home or at work. On October 22nd, PURE AIR GROUP placed a portable Sanuvox purifier in my home. The following is a summary of the dramatic results I began to experience almost immediately.

Week One

The Sanuvox portable purifier arrived on Friday. I left it running every night in my bedroom while sleeping. In addition, it ran the entire weekend. Tuesday, Oct. 26 was the first morning that I did not have to use my inhaler in weeks; throughout this week, I only occasionally needed it at night. As well, I was able to decrease my intake of Zyrtec to only as needed, as opposed to every day.

Week Two

Remarkably, my morning usage of the inhaler has ceased completely! Furthermore, I only needed to use it two nights throughout the entire week! I have not had to take any Zyrtec for over a week.

Week Three

I haven't taken an allergy pill in 2 weeks! I have only had to use my inhaler twice this week – once at night and once at work.

When I am home during the day, I keep the unit downstairs with me. At night, I place it back in my bedroom. Before I purchased the portable Sanuvox purifier, I was met with a smelly, damp and moldy odor when entering my front door. Now, I come in to a fresh, odor-free home. My medication intake has decreased to nearly nothing and my inhaler usage diminished substantially. The portable Sanuvox purifier has made an incredible difference in my life! Thank You!

Sincerely,

Cheryl Zdanczyk

To Whom It May Concern

Gentlemen:

This is to advise that Creative Energy provided a Sanuvox air purifier Model #S1000FX for a nursing station in our Hospital to help eliminate odor problems emitting from our geriatrics department.

This unit was installed in early May of this year and we were so pleased with the results, that additional units were ordered for other floors.

As these units eliminate obnoxious odors, algae, mold and mildew problems, we are anticipating installing additional units throughout our facilities.

Very truly yours,

To Clean Air Innovations Inc.
(Sanuvox Technologies)

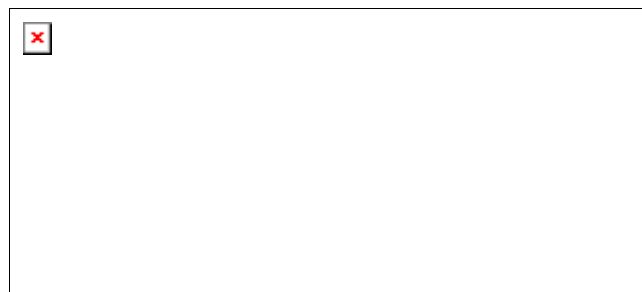

I am writing to you concerning the Sanuvox system that I had installed by Fred and Mike Huffman of Clean Air Innovations Inc. I have nothing but great satisfaction for the product, and the father & son teamwork that went into installing the system in my home. Clean Air Innovations Inc. had to custom build my duct system to accommodate the R3500X because of the way my air handling system for my mobile home was installed. They took the extra time also to further improve my airflow for no extra cost.

I have a granddaughter that is 3 years old, from which started showing signs of breathing problems right after my husband passed away in September of 2003. We had a major water supply line burst and it was hid under the plastic liner under our mobile home. The water leaked for 4 months without being detected, until we began smelling something sickening. The baby had to go to the doctor for respiratory problems many times since my husband's death. The leak ended up being found and fixed, but not before mold had taken over a majority of our home.

Thank God for Clean Air Innovations Inc., since installing the Sanuvox UV whole house air purifier my baby is now sleeping without coughing all night, and now she can play without any breathing problems. The awful musty odor smell is now gone. I could tell the difference in the air quality the very first day. Believe me I have tried other avenues but to no avail.

I highly recommend this product to anyone that has respiratory problems or odors in their home!

Thanks Fred, and Mike Huffman

Dear Pure Air Group,

When we moved into our newly built house, we were not aware of the amount and kinds of chemicals used in home building materials and interior products such as formaldehyde, glue, etc. (in wallboard, flooring, insulation, paint carpet and not to forget furniture). We also dealt with a great deal of dust in the air. I should mention that especially when I was vacuuming, my nose was runny and my eyes watered. I was miserable, not realizing the cause, in addition to the effects of pollen from the trees and plants in and around the house.

You, at Pure Air Group, offered a simple solution and installed a Sanuvox Air Purification System as well as an electronic air filter. That made a difference in my life like night and day: no more runny nose and watery eyes, less dusting and cleaning. I can only imagine what Pure Air Group and these systems can mean for children and adults who have breathing problems like asthma and allergies, not to mention the defense against colds and flu!

It really feels like a breath of Pure Air!

Thank You!

Subject: Sanuvox

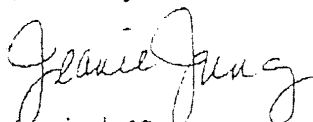

Generally I am not one to write letters about a specific product, but in this case the Sanuvox has surpassed my expectations. As a consumer, I expect the product to function when installed or purchased. After reading information, as well as researching alternatives to my allergy problems, we decided that we would install the Sanuvox. Since it came with a money back guarantee, we had nothing to lose. My husband and I felt that we would give this a try. The sales representative was positive that this would help my allergies, I remained skeptical.

The Sanuvox was installed in our home and within hours, I found that I could breathe better and the air in our home had a fresher smell. Since the Sanuvox works only while the air or the furnace is operating, we left the fan on the heating and cooling unit continually. Within several days I found that I no longer required nightly decongestants or antihistamines to breathe. This was a pleasant surprise not to wake up with 'cotton mouth' from these products. As the allergens have been reduced we have returned to using the Sanuvox only with the normal air conditioner.

The best surprise was my improved health. We felt this was due to the higher air quality provided by the Sanuvox attached to our furnace and air conditioning unit in our home. We now have the portable version so it goes with us on vacation or to the work place. This has proven extremely helpful when traveling and receiving a room that you know has had smokers. Within an hour the room smells fresh. During the flu season, it goes to the workplace to help prevent the growth of viruses and germs that reproduce at a rapid rate with recirculated warm indoor heat. I have been sick less often and feel it is related to having the Sanuvox.

The bottom line is that the Sanuvox does all that I expected and even more.
Thanks from a very satisfied customer.

Yours truly,

Jeanie Jung

[REDACTED]
[REDACTED] WI [REDACTED]

Dear Curt,

Thank you for installing my Sanuvox Air Purifier. It has exceeded my expectations. I have Asthma and also suffer from allergies. I truly put it to the test before writing you. With the extremely wet year we have been having and, mold as one of my severe allergies, I have had hardly any allergy problems after the new purifiers installation. You have no idea how nice it is to sleep all night long without sneezing for hours. The use of my rescue inhaler for my asthma has been very minimal. This has been a very great improvement. The allergies will be activated after I have been outside mowing the lawn or working in our flower or vegetable gardens, but coming into the house with the combination of the air purifier, space guard air filter and the air-conditioning, the sneezes soon dissipate. We also run our furnace fan all the time to help circulate the air constantly through the purifier per your suggestion. It is great!!

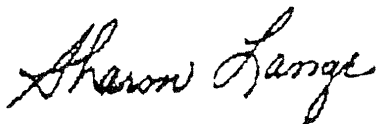

We were traveling for a week and staying in a variety of hotels & motels recently and I was back to stuffy head and sneezes and the asthma's wheezes returned. I could not wait to be home in my "good air". We are seriously considering a portable unit to use in my office, our 5th wheel trailer and hotel rooms. If you have never been an allergy or asthma sufferer you take breathing free and easy for granted. I can assure you that the Sanuvox Air Purifier has been truly worthwhile investment in health and comfort.

The air in the house just feels fresher and cleaner. We installed new carpeting and were amazed that the chemical odors from the new carpet were eliminated so quickly. The same is true with cooking odors. Even the air in my basement computer room is fresh and clean feeling.

Further proof that the Sanuvox Air Purifier really works was made clear when my parents stopped at our house the day after our daughter's wedding. My Dad has allergies, asthma and emphysema and had been hospitalized for bacterial pneumonia 3 times in the last year. He had been having breathing problems and was using his oxygen all the time. He said he could breath fine at our house and noticed a real difference in the air. That was all it took. Dad asked his doctor on the next Tuesday if the air purifier might be helpful for him and Doc said it was worth a try. I was immediately on the phone to you Curt and you very quickly got an air purifier installed for him. He is very happy with it too!! He only uses his oxygen at night while sleeping, per the Doctor as a preventative tool in treating his lung problems.

Curt, I can't thank you enough for bringing Sanuvox Air Purifier into our lives!!!

Sincerely,

Sharon Lange

Subject: Smoking Room Unit 402 Second Hand Smoke Cleanser System

Gentleman,

Since the installation of your Model S1000 Second Hand Smoke Cleanser System, we are completely satisfied with its efficiency in controlling the smoke and odors due to the smokers in the smoking room.

The Sanuvox S1000 was installed due to the fact that patients and Health Sector staff complained about the secondhand smoke and persistent odors penetrating the corridors and adjacent rooms of the smoking area.

We have used your Second Hand Smoke Cleanser System since October 1998 and appreciate the fact that it has operated extremely efficiently and quietly. It is used in a smoking room, which is approximately 250 square feet. In this area, there are on average 8 smokers at any one time, and a maximum of 15 smokers. Since installing the Sanuvox S1000, the smoke and odors are cleaned up very quickly. The maintenance is easy and requires a minimum of labor, considering the environment where it must perform.

When our institution agrees on the application of the new Tobacco Act, we will study the possibility to install other units in other areas that have similar problems in our institution.

Yours very truly

Gilles Richard
Maintenance Supervisor

Subject: Mold & Mildew in B Wing

To Whom It May Concern:

In November of 2001 we experienced a compressor failure in the 30 ton A/C unit cooling one wing of the hospital. At this time the building was empty, so we decided to postpone replacing the compressor. This was a big mistake! Being in Florida and the high humidity, it only took a couple of weeks for the mold and mildew to take over. It was all over the walls, the ceiling, and the space above the dropped ceiling.

We hired a professional cleaning service to eliminate the problem. This cleaning was very expensive and took several days to complete. We also, at this time, had the compressor in the A/C unit replaced, hoping we had cured the problem. But, to our surprise, we noticed the mold had returned. We then had the same company return to clean the wing again. The cost was the same as before and time consuming.

A couple of weeks later we noticed the mold had returned for the third time. This time I suggested that we call Fred Huffman with Clean Air Innovations to take a look at the situation. He recommended installing a Sanuvox bio-wall ultra violet system in the A/C system cooling that wing of the hospital. Since the cost of installing the Sanuvox was a fraction of the cost of the cleaning jobs, we decided to give it a try.

Before Fred installed Sanuvox bio-wall, breathing was very difficult in this wing, due to mold spores in the air. We had to wear masks when in this area. In just 3 days after the Sanuvox was installed the wing smelled fresh as the outdoors. The mold and mildew disappeared in just a few days, and has not returned. That was over 6 months ago.

To our surprise, 2 weeks later we got a bonus. We started to find a large amount of bugs and insects dying all over the wing. To our surprise it was due to the Sanuvox system. They were feeding on the mold and mildew. When their food source died so did the bugs.

I highly recommend the Sanuvox system and Fred Huffman at Clean Air Innovations. The system works! Thanks for solving a very serious problem.

Sincerely,

Gil Lopez

To whom it may concern,

I am the owner of an optometry clinic in Place Versailles mall in Montreal. Our office is situated on the second floor just on top of a dry cleaner.

The chemical odors from the product that the dry cleaner uses is distributed through the ventilation system and spread into the other occupant's space. At some point, those odors are very strong and cause our employees and customers headaches.

We have installed 4 - MB500X Sanuvox air purifiers to help clean the air and get rid of those odors like our HVAC contractor had suggested. It didn't take long after the installation for us to notice a big difference.

I am happy to say that it got rid of all the odors and now my employees and customers can breath a clean and odors free air in our offices.

I highly recommend to any one who has a similar situation to have a Sanuvox air purifiers installed.

Thank you,

Dr. Hélène Lalande, o.d.

[REDACTED]

Dear Ken:

I can't thank you enough for recommending the Sanuvox Air Cleaner. It has made a big difference in the quality of my life. As long as I'm in the house, my sinuses and bronchial tubes are considerably less irritated. Because they are less irritated, I have more energy, I sleep better and longer with fewer choking attacks and can be outside at least 10 to 15 minutes before some of my allergies trigger an attack. Prior to the Sanuvox attacks could occur almost instantly when I went outside with irritated bronchial tubes. Now I can at least pick up the mail, pull a weed or two or have a conversation with a neighbor.

Even when I do have an attack, I seem to recover quicker in the house than I did before the Sanuvox was installed. Thank you again !

July 13, 2000

Dear *Sigge*

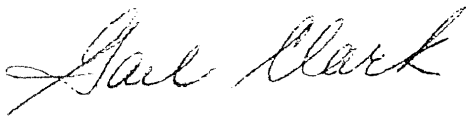

Thank you for introducing us to Sanuvox and its clean air technology. It's great!

Since purchasing our P100 Portable Next Generation Air Purifier(TM), my personal health has improved significantly. As a long time victim of asthma and allergy symptoms, it is absolutely wonderful to wake up each morning without the 'itchy eyes and runny nose' that usually greeted me before we started using the Sanuvox air purifier right in our master stateroom. Just by running the unit for 8 hours during the day, I can enjoy a clean air environment all day and all night.

Purchasing a Sanuvox air purifier unit was definitely a wise investment. As you know, keeping the air fresh and clean living on a boat is often a challenge and Sanuvox is definitely helping us to keep a 'clean air' environment.

Thanks once again for your help and introducing us to Sanuvox.

Sincerely,

Co-skipper 'Moments Notice'

[REDACTED]

Dear Charlie,

I wanted to drop you a note to let you know how extremely happy my wife and I are with the Sanuvox air purifying device that you installed in our home this past March. As you probably recall, my wife suffers from both asthma and allergies. Prior to you installing the Sanuvox she was really having a tough time with both breathing and coughing throughout the day and nighttime. Within a few short days of the Sanuvox being installed she started feeling 100% better. She was able to stop taking her allergy medication as well as the asthma inhaler. Even though I don't have any of those problems, I could tell a marked difference in the air inside our home. The Sanuvox device is truly an incredible product! On top of that I couldn't believe how affordable it was. For what it did for my wife it was worth ten times the price. Thanks again for recommending the Sanuvox....my wife and I couldn't be more pleased with what it has done.

Sincerely,

[Handwritten signature]

Dear California Cool Dealer,

07/01/97

We are constantly searching for new and innovative products, that work well and can generate incremental profits for our best customers. I think we have found a super new product that you can sell and install with confidence. The Sanuvox R100C ULTRAVIOLET air purifier.

Several dealers in Southern California have begun offering ultra-violet air purification devices. We have looked at several different systems and have found what we think is the best one (the Sanvox R100C).

Sun light is the most effective natural air purifier known to break down airborne contaminants. Ultraviolet air purifiers use UV light to simulate the sun's purifying effects, destroying both biological and chemical contaminants that are present in your customers homes.

Indoor air quality is often cited as a growing concern for todays consumer. Recent studies have shown that the air inside a home or buisness can be 100 times more polluted than outside air. We know how badly polluted the air in Southern California can get.

The Sanuvox R100C UV air purifier can remove as much as 99% of the organisms and contaminants that cause this indoor air pollution. In fact, this product will lower the bacteria count in a room more than ventilating the room at the rate of 100 air changes per hour! (Normal ventilation rates are from 1 to 3 air changes per hour)

A recent study showed that the Sanuvox Air Purifier greatly reduced the concentration of bacteria and molds in several test sites while the outdoor air quality got worse! Also, during this study it was found that the R100C air purifier did not add ozone to the conditioned area. (Other UV air purifiers produce Ozone)

Compare the features of this air purifier to any other on the market and you will find it's the best available. This unit will be sold through our California Cool dealers for the low per unit price of ~~\$799.00~~. This is a great opportunity for you to promote a high profit product and take care of your customers IAQ concerns. Please review the attached information and if you have any questions, give me a call.

Good selling,

Scott Carreiro

Subject: Re: Testimonial letter on Sanuvox product.

To whom it may concern.

We have had our 4 Sanuvox UV sanitizers installed for 4 year at our premise in #2 first Canadian Place in Toronto. For our IS department about 10,000 sq feet. This was done because of the articles of sick building syndrome that we were reading about in the news at that time 1997. We were doing office renovation at the time and thought this would be a good opportunity to try this technology. We found that with in days of the installation that the air quality seemed to improve and it did eliminate the ambient smells of the new carpet and paint. The air smelled better. We also found that in the first winter season we seemed to have a lower incidents of people being off work with colds or flu's. I would recommend the use of these UV sanitizers. We have since left that area and have had them removed for redeployment in some of the technicians homes. I recently installed one of the units with a new bulb in my home I will let you know how it works in the future.

Dear Mr. Carter:

Subject: Senuvox air purifier

Approximately four to five months ago I spoke to Mike Hertless with Service Pros of Virginia Inc. concerning air quality in my residence. I had mentioned to him that my primary concerns were with common household allergens such as dust and odors, but I was also looking for something that would help control airborne viruses, such as the common cold etc. I told him that when it came to colds and other viruses that I receive it from all sides, as I am the father of two elementary school age children, plus my wife is also an elementary school teacher, and then to top it off I work at a local University around students. So my chances of contracting a virus or cold was pretty good. He immediately told me about the Senuvox air purifier, and explained how it used UV light to kill odors and germs. I must admit that I was skeptical at first because less than a year ago I had purchased one of the "Living Air" console type purifiers that made all kinds of claims associated with air purification, but turned out to be nothing more than an overrated ozone producer. So I got him to drop by some literature, after reading the literature and doing some research on my own, I called him back and told him to install one for me. I was impressed that it only took him the better part of an hour to install the entire unit, and the total cost involved was a lot less than the cost of the "other machine" and there is no special maintenance involved with it. But what impressed me the most is I can no longer smell perfume, chemical, cooking or any other type odors when my house is closed up. And this is the first time in years that I have awoke in the mornings uncongested and able to breathe. I also want to mention that my son came down with bad cold about three to four weeks ago, and so far no one else in the house has contracted it. Needless to say I am very pleased with the purchase of this unit, and would definitely recommend it to anyone. If you have any questions concerning this you may reach me at the addresses or phone number listed in the header of this letter. Thank You.

Sincerely,

Michael W. Miller
