**Saber APR UV Object Purifier**

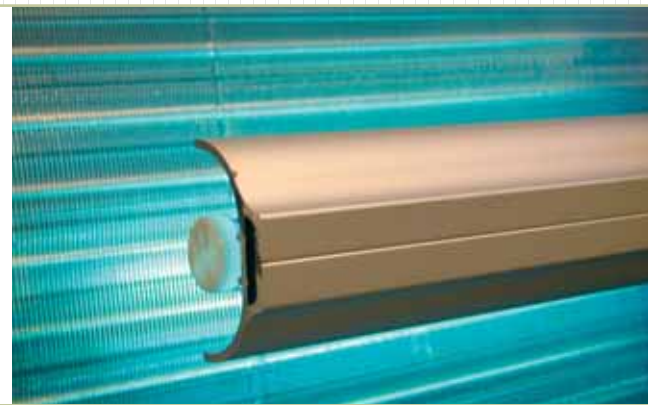

The Saber APR is a patent pending “Object” purifier, designed to bask Stationary Objects (i.e. A/C coil, duct walls) with UVC Germicidal Energy, preventing and destroying mold and other microbial contaminants.

The Saber APR is available with a 12" and 18" 19mm High Intensity UVC Quartz Lamp

By using a rotatable Anodized Aluminum Parabolic Reflector, the Saber APR Object Purifier is able to direct virtually all the UV Energy onto the coil without losing UV on the back-end, top and bottom of the Lamp. *The Reflector drastically extends Lamp life up to 3 times the competition by intensifying the UV Energy throughout the Lamp's 3 year operating life.*

The Reflector also protects plastics and wiring from destructive UV rays (i.e. plastic drainpans). Using any other UV Fixture/Emitter will result in losing more than half the UV Intensity.

**Continually basking the coil with UVC Energy will prevent & destroy mold growth.**

**FEATURES**

- Destroys mold and other microbial growth on the “Object” as well as biological odors
- High Intensity 19mm UVC Quartz Lamp
- 3 Year Lamp operating life
- Adjustable Anodized Parabolic Reflector directs and reflects UV Energy while protecting plastics from destructive UV Rays
- Bright LED “Smart Lamp System” Visual Status Display
- Available with 12” or 18” UV Lamp
- 3 year warranty on parts including UV Lamp
- 110 / 220 V, 50-60 HZ
- CSA C/US Certified & CE Approved

**OTHER SABER PURIFIERS ALSO AVAILABLE**

- **Saber 110V UV Object Purifier.** Available in 12” and 16” UVC Lamp lengths 110 volt
  - **Grab-And-Go Packaging**
  - **Saber 24V Object Purifier.** 24 volt Saber available with a 16” UVC Lamp
- Saber 110 and Saber 24 have a 1 year warranty including the UV Lamp
